

21st September 2026

Dear parents,

Year 5 have planned an exciting workshop at school as part of our Science provision for this half term's science topic based on Earth and Space. The purpose of the workshop will be to have some experiential learning within the classroom. This workshop incorporates visual, audio and kinaesthetic learning techniques to inspire budding scientists and engineers. The workshop seeks to extend pupils' learning through demonstrations and investigations of real life science to build on what we offer the children as part of their curriculum.

The Workshop is called: **Blackholes**. It is an innovative workshop that explores the tricky concept of black holes by discovering what they are through using the right terminology and through engaging practical investigation. Children will learn the physics, forces and formation of black holes and they also get to build their own black hole model to take home too.

All classes will be taking part on **Friday 2nd October 2026**

The cost of this workshop is **£7.50** which will cover the cost of the visiting company and all the resources used. In the unlikely event that the costs cannot be covered by contributions, the workshop will be cancelled. If your child is eligible for Pupil Premium the school can support you. Payments to be paid via Arbor > Trips > Y5 Science Blackholes Workshop by Thursday 1 October 2026 at the latest.

Many thanks for your continued support.

Yours sincerely,

Emine Sabri

Year 5 Achievement Leader
